Aircraft Pilots with Thai Nationality

Conversations with representatives speaking for the BPP indicate that this customer desires part or possibly most of his flights to outlying areas be performed by Thai Nationality personnel only. This customer feels that we should take immediate steps to develop such capability. Registration of aircraft and certification of pilots is, of course, very much involved, and it is suggested our people take advantage of the earliest opportunity to discuss this matter with the customer in Bangkok.

George A. Doole, Jr.
